FORWARD LOOKING STATEMENT

This communication contains "forward-looking statements." Such forward-looking statements may include, without limitation, statements about the proposed acquisition of Meda AB (publ.) ("Meda") by Mylan N.V. ("Mylan" or the "Company") (the "Proposed Transaction"). Mylan's related public offer to the shareholders of Meda to acquire all of the outstanding shares of Meda (the "Offer"), Mylan's acquisition (the "EPD Transaction") of Mylan Inc. and Abbott Laboratories ("Abbott") non-U.S. developed markets specialty and branded generics business (the "EPD Business"), the benefits and synergies of the EPD Transaction and the Proposed Transaction, future opportunities for Mylan, Meda, or the combined company and products and any other statements regarding Mylan's, Meda's or the combined company's future operations, anticipated business levels, future earnings, planned activities, anticipated growth, market opportunities, strategies, competition, and other expectations and targets for future periods. These may often be identified by the use of words such as "will", "may", "could", "should", "would", "project", "believe", "anticipate", "expect", "plan", "estimate", "forecast", "potential", "intend", "continue", "target" and variations of these words or comparable words. Because forward-looking statements inherently involve risks and uncertainties, actual future results may differ materially from those expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to: uncertainties related to the Proposed Transaction, including as to the timing of the Proposed Transaction, uncertainties as to whether Mylan will be able to complete the Proposed Transaction, the possibility that competing offers will be made, the possibility that certain conditions to the completion of the Offer will not be satisfied, and the possibility that Mylan will be unable to obtain regulatory approvals for the Proposed Transaction or be required, as a condition to obtaining regulatory approvals, to accept conditions that could reduce the anticipated benefits of the Proposed Transaction; the ability to meet expectations regarding the accounting and tax treatments of the EPD Transaction and the Proposed Transaction; changes in relevant tax and other laws, including but not limited to changes in healthcare and pharmaceutical laws and regulations in the U.S. and abroad; the integration of the EPD Business and Meda being more difficult, time-consuming, or costly than expected; operating costs, customer loss and business disruption (including, without limitation, difficulties in maintaining relationships with employees, customers, clients, or suppliers) being greater than expected following the EPD Transaction and the Proposed Transaction; the retention of certain key employees of the EPD Business and Meda being difficult; the possibility that Mylan may be unable to achieve expected synergies and operating efficiencies in connection with the EPD Transaction and the Proposed Transaction within the expected time-frames or at all and to successfully integrate the EPD Business and Meda; expected or targeted future financial and operating performance and results; the capacity to bring new products to market, including but not limited to where Mylan uses its business judgment and decides to manufacture, market, and/or sell products, directly or through third parties, notwithstanding the fact that allegations of patent infringement(s) have not been finally resolved by the courts (i.e., an "at-risk launch"); any regulatory, legal, or other impediments to Mylan's ability to bring new products to market; success of clinical trials and Mylan's ability to execute on new product opportunities; any changes in or difficulties with our inventory of, and our ability to manufacture and distribute EpiPen® Auto-Injector, to meet anticipated demand; the scope, timing, and outcome of any ongoing legal proceedings and the impact of any such proceedings on financial condition, results of operations and/or cash flows; the ability to protect intellectual property and preserve intellectual property rights; the effect of any changes in customer and supplier relationships and customer purchasing patterns; the ability to attract and retain key personnel; changes in third-party relationships; the impact of competition; changes in the economic and financial conditions of the businesses of Mylan, Meda or the combined company; the inherent challenges, risks, and costs in identifying, acquiring, and integrating complementary or strategic acquisitions of other companies, products or assets and in achieving anticipated synergies; uncertainties and matters beyond the control of management; and inherent uncertainties involved in the estimates and judgments used in the preparation of financial statements, and the providing of estimates of financial measures, in accordance with accounting principles generally accepted in the United States of America ("GAAP") and related standards or on an adjusted basis. For more detailed information on the risks and uncertainties associated with Mylan's business activities, see the risks described in Mylan's Annual Report on Form 10-K for the year ended December 31, 2015 and its other filings with the Securities and Exchange Commission ("SEC"). These risks and uncertainties also include those risks and uncertainties that will be discussed in the offer document to be filed with the Swedish Financial Supervisory Authority ("SFS") and the Registration Statement on Form S-4 to be filed with the SEC and the EU Prospectus to be filed with the Netherlands Authority for the Financial Markets ("AFM") or another competent EU authority. NON-GAAP FINANCIAL MEASURES

This communication includes the presentation and discussion of certain financial information that differs from what is reported under GAAP. These non-GAAP financial measures, including, but not limited to, adjusted total revenues, adjusted diluted earnings per share ("adjusted diluted EPS"), adjusted free cash flow, adjusted third party net sales, constant currency adjusted total revenues, constant currency adjusted third party net sales, adjusted gross margin, adjusted R&D as % of adjusted total revenue, adjusted SG&A as % of adjusted total revenue, adjusted EBITDA, adjusted net earnings, adjusted operating cash flow, adjusted EBITDA margin, and adjusted effective tax rate, are presented in order to supplement investors' and other readers' understanding and assessment of the Company's financial performance. Management uses these measures internally for forecasting, budgeting and measuring its operating performance. In addition, primarily due to acquisitions, Mylan believes that an evaluation of its ongoing operations (and comparisons of its current operations with historical and future operations) would be difficult if the disclosure of its financial results were limited to financial measures prepared only in accordance with GAAP. In addition, the Company believes that including EBITDA and supplemental adjustments applied in presenting adjusted EBITDA pursuant to our debt agreements is appropriate to provide additional information to investors to demonstrate the Company's ability to comply with financial debt covenants (which are calculated using a measure similar to adjusted EBITDA) and assess the Company's ability to incur additional indebtedness. We also report sales performance using the non-GAAP financial measure of "constant currency" total revenues, adjusted total revenues, third party net sales, and adjusted third party net sales. This measure provides information on the change in net sales assuming that foreign currency exchange rates had not changed between the prior and current period. The comparisons presented as constant currency rates reflect comparative local currency sales at the prior year's foreign exchange rates. We routinely evaluate our third party net sales performance at constant currency so that sales results can be viewed without the impact of foreign currency exchange rates, thereby facilitating a period-to-period comparison of our operational activities, and we believe that this presentation also provides useful information to investors for the same reason. The "Summary of Adjusted Revenues by Segment" table in the Appendix compares third party net sales and, as applicable, adjusted third party net sales on an actual and constant currency basis for each reportable segment and the geographic regions within the Generics segment for the three months ended and year ended December 31, 2015 and 2014. Also, set forth in the Appendix, Mylan has provided reconciliations of its non-GAAP financial measures to the most directly comparable GAAP financial measures. Investors and other readers are encouraged to review the related GAAP financial measures and the reconciliations of the non-GAAP measures to their most directly comparable GAAP measures set forth below, and investors and other readers should consider non-GAAP measures only as supplements to, not as substitutes for or as superior measures to, the measures of financial performance prepared in accordance with GAAP.

- Q1 adjusted gross margin expected to be below full year adjusted gross margin guidance range due mainly to previously anticipated seasonal factors in North America, Europe and ROW as well as increased competition on North American products
 - Development of adjusted gross margin consistent with 2015 when Q1 margin was more than 2% less than annual margin
- Q1 adjusted R&D expense materially above Q4 2015 due to ramp up of respiratory studies and timing of payments on biologics projects
 - Q1 adjusted R&D expense significantly above full year guidance range for adjusted R&D expense
- FY 2016 guidance ranges for adjusted gross margin and adjusted R&D expense remain unchanged

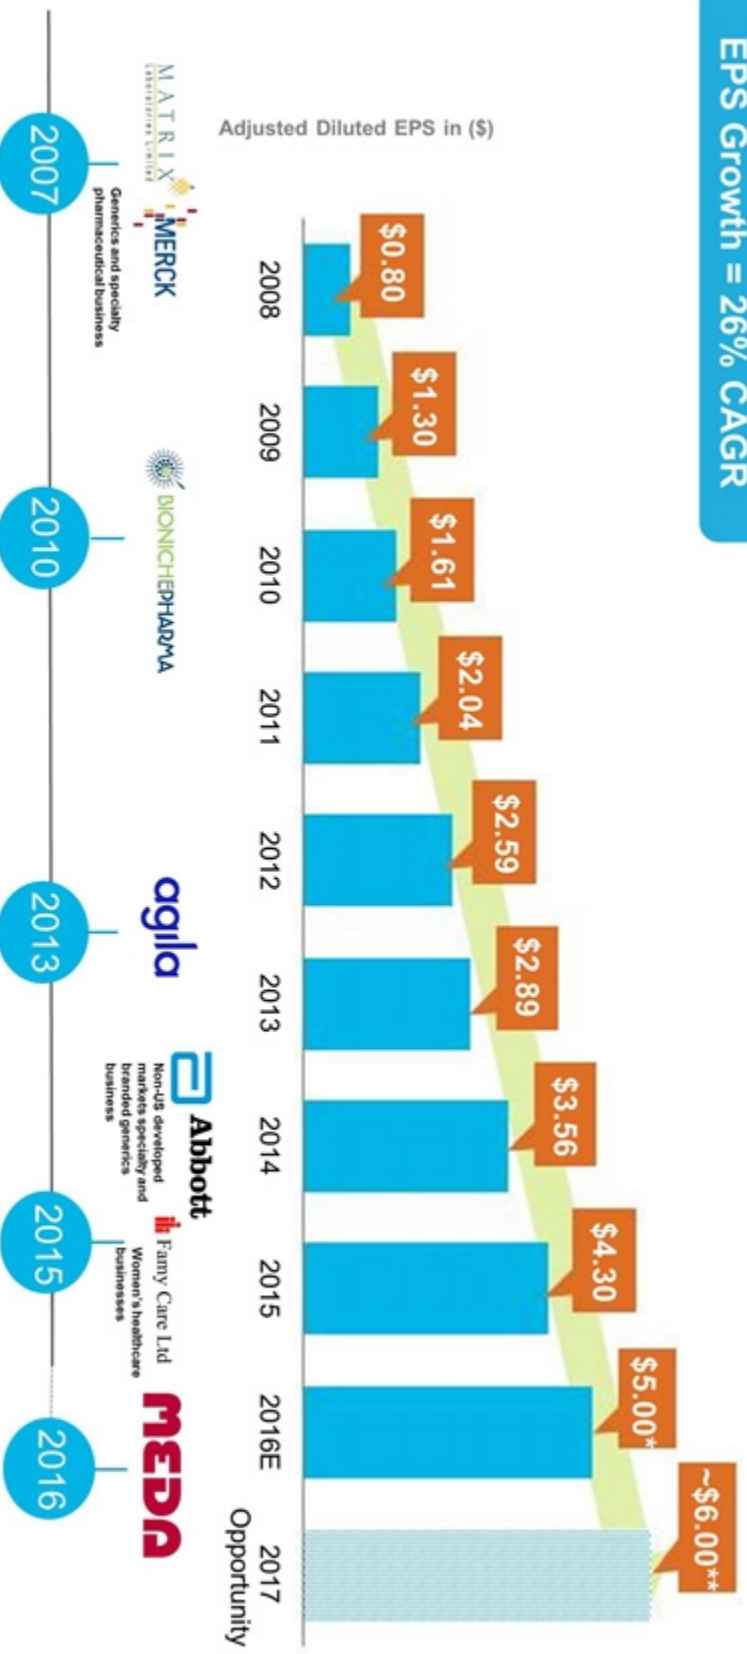

As a result of the foregoing previously anticipated factors, and as stated on our Q4 2015 earnings call, “we expect the quarterly development of our EPS for 2016 to be similar to 2015 with Q1 being relatively flat to the prior year.”

Reconciliation of Non-GAAP Metrics

Impact of Shares Issued in EPD Transaction

GAAP requires that EPS be calculated for each individual period based on average shares outstanding for the period (both quarter-to-date and year-to-date). The issuance of shares to Abbott in the first quarter of 2015 impacted the average quarterly outstanding shares versus average outstanding shares for the full year of 2015. The below table shows a quarterly reconciliation of adjusted diluted EPS (in millions, except per share amounts):

	Three Months Ended					Impact of Average Share Count	Year Ended December 31, 2015
	March 31, 2015	June 30, 2015	September 30, 2015	December 31, 2015

Reconciliation of 2016 Forecasted Guidance

The reconciliations below are based on management's estimate of adjusted net earnings and adjusted diluted EPS, adjusted EBITDA and adjusted cash provided by operating activities for the twelve months ending December 31, 2016. Mylan expects certain known GAAP amounts for 2016, as presented in the reconciliation below. Other GAAP charges, including those related to potential litigation, asset impairments and restructuring programs that would be excluded from the adjusted results are possible, but their amounts are dependent on numerous factors that we currently cannot ascertain with sufficient certainty or are presently unknown. These GAAP charges are dependent upon future events and valuations that have not yet occurred or been performed. The unaudited forecasted amounts presented below are stated in millions, except for earnings per share data.

The Company's annual budgeting process, which is the basis for its 2016 earnings guidance, is performed on an adjusted basis. That process is then supplemented by adjusting net income for known differences between the Company's budgeted adjusted net income and GAAP net income, without application of such differences to specific U.S. GAAP income statement line items. As such, the Company has not reconciled its 2016 earnings guidance for adjusted gross margin, adjusted R&D, adjusted SG&A and the adjusted effective tax rate to their most directly comparable GAAP measures because the comparable GAAP financial measures on a forward-looking basis is not accessible and cannot be estimated without unreasonable effort.
