

Supplement to the prospectus in relation to Mylan's offer to the shareholders of Meda

("**Mylan**") to the shareholders of Meda Aktiebolag (publ.) ("**Meda**") in accordance with the terms specified in the Prospectus for consideration consisting of a combination of cash and Mylan Shares.

Factors that could cause or contribute to such differences include, but are not limited to: uncertainties related to the Transaction, including as to the timing of the Transaction, uncertainties as to whether Mylan will be able to complete the Transaction, the possibility that competing offers will be made, the possibility that certain conditions to the completion of the Offer will not be satisfied, and the possibility that Mylan will be unable to obtain regulatory approvals for the Transaction or be required, as a condition to obtaining regulatory approvals, to accept conditions that could reduce the anticipated benefits of the Transaction; the ability to meet expectations regarding the accounting and tax treatments of the Transaction and the EPD Transaction, changes in relevant tax and other laws, including but not limited to changes in the U.S. tax code and healthcare and pharmaceutical laws and regulations in the U.S. and abroad; the integration of the EPD Business and Meda being more difficult, time-consuming, or costly than expected; operating costs, customer loss and business disruption (including, without limitation, difficulties in maintaining relationships with employees, customers, clients, or suppliers) being greater than expected following the EPD Transaction and the Transaction; the retention of certain key employees of the EPD Business and Meda being difficult; the possibility that Mylan may be unable to achieve expected synergies and operating efficiencies in connection with the EPD Transaction and the Transaction within the expected time-frames or at all and to successfully integrate the EPD Business and Meda; expected or targeted future financial and operating performance and results; the capacity to bring new products to market, including but not limited to where Mylan uses its business judgment and decides to manufacture, market, and/or sell products, directly or through third parties, notwithstanding the fact that allegations of patent infringement(s) have not been finally resolved by the courts (i.e., an "at-risk launch"); any regulatory, legal, or other impediments to Mylan's ability to bring new products to market; success of clinical trials and Mylan's ability to execute on new product opportunities; any changes in or difficulties with Mylan's inventory of, and its ability to manufacture and distribute, the EpiPen® Auto-Injector to meet anticipated demand; the scope, timing and outcome of any ongoing legal proceedings and the impact of any such proceedings on financial condition, results of operations and/or cash flows; the ability to protect intellectual property and preserve intellectual property rights; the effect of any changes in customer and supplier relationships and customer purchasing patterns; the ability to attract and retain key personnel; changes in third party relationships; the impact of competition; changes in the economic and financial conditions of the businesses of Mylan, Meda or the Combined Company; the inherent challenges, risks, and costs in identifying, acquiring, and integrating complementary or strategic acquisitions of other companies, products or assets and in achieving anticipated synergies; uncertainties and matters beyond the control of management; and inherent uncertainties involved in the estimates and judgments used in the preparation of financial statements, and the providing of estimates of financial measures, in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"), International Financial Reporting Standards ("IFRS") and related standards or on an adjusted basis. For more detailed information on the risks and uncertainties associated with Mylan's business activities, see the risks described in Mylan's Annual Report on Form 10-K for the year ended December 31, 2015, its Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2016 and its other filings with the U.S. Securities and Exchange Commission (the "SEC"). These risks and uncertainties also include those risks and uncertainties that are discussed in the Offer Document, the Registration Statement on Form S-4 which was filed with the SEC on April 11, 2016, as amended (the "Registration Statement"), and the EU Prospectus that was approved by the Netherlands Authority for the Financial Markets (*Stichting Autoriteit Financiële Markten*) (the "AFM") and published on June 16, 2016 (the "EU Prospectus"). CEO statement

The second quarter of 2016 was another promising quarter for Meda and our performance for the year-to-date through June developed fully in line with our expectations and financial plans. Overall, our growth businesses increased by 9% in the second quarter, contributing to a solid organic growth rate of 2% for the whole group. This growth was driven by resilient sales from our ongoing business, supported by several of our key growth products within the Rx-product area. We also saw particularly strong performance from our Cx-franchise and Emerging Markets business. As expected, our growth was slightly offset by reduced royalties from our agreement with Valeant, as well as the divestment of the Euromed manufacturing site.

Looking at our regions, our US business saw considerable improvement over the previous quarter, with sales totaling SEK 751 million. We continued to be encouraged by the performance of our top 25 products, which grew by 5% at CER. Our newly established affiliate in Canada also contributed very positively. This strength too was offset by the anticipated negative impact from reduced royalty revenue from outlicensed dermatology products.

Sales for Western Europe totaled SEK 3,197 million, with mixed performance across the region. While we saw strong performance in the Nordics, France, the UK and Italy continued to put some pressure on top line performance. We also continued to see strong performance from key products, especially Dymista, which continued to increase sales and acceptance, and position itself in the #1 or #2 position in several European markets. We also saw convincing growth from EpiPen® Auto-Injector, Saugella and Armolipid in the quarter. While Italy continues to be impacted by our restructuring of this business, we are confident that the actions we are taking will establish a strong platform for the future.

Emerging Markets reported exceptionally strong performance during the quarter, with sales of SEK 1,016 million, corresponding to 15% growth at CER. Key markets such as Greater China, Russia and Turkey performed particularly well, largely driven by our Cx-franchise. Sales of Dona stood out in the region with a growth rate of 131% at CER.

In all, we delivered strong sales for the second quarter of SEK 5,015 million and EBITDA excluding non-recurring items of SEK 1,577 million, representing an EBITDA margin of 31.4%. Free cash flow excluding non-recurring items for the quarter improved to SEK 975 million. Again, this performance was in line with our expectations.

Finally, we remain extremely enthusiastic about Mylan’s public offer for Meda. The combination of our business is a natural fit, and provides compelling industrial logic. We expect that within Mylan much more can be done with our very attractive businesses and products as part of their global platform. We also expect our businesses in the U.S. and Europe to be far stronger, as we benefit from greater scale and diversity, and to be able to accelerate our growth in Emerging markets.

The acceptance period for the offer runs up to and including 29 July, and Mylan has stated that it expects the transaction to close during the third quarter.

Agreements and key events

Mylan N.V., a company incorporated in the Netherlands, and whose ordinary shares are traded on the NASDAQ Global Select Market and the Tel Aviv Stock Exchange, announced on February 10, 2016, a recommended public offer to the shareholders of Meda AB to transfer all of their shares in Meda AB to Mylan N.V. for a consideration consisting of a combination of cash and shares of common stock in Mylan N.V. (the

Offer). On June 16, 2016 Mylan N.V. published its Offer Document to the shareholders of Meda AB relating to the Offer. The acceptance period for the Offer runs from and including June 17, 2016 up to and including July 29, 2016. Meda's Board of Directors recommends that Meda shareholders accept Mylan's Offer and Meda's two largest shareholders, representing approximately 30 percent of Meda's outstanding shares, have undertaken to accept the Offer.

Long-term performance based incentive programs (LTI-programs)

As of June 30, 2016, Meda has two outstanding LTI-programs approved by the AGM in 2014 and 2015. Meda is subject to a public takeover by Mylan which may lead to a change of control (CoC). Therefore, the board of Meda AB decided to modify the programs and convert them with a cash compensation to the participants in event of a CoC, provided that the individuals are still employed by Meda at that date. This means that the LTI-programs have been reclassified from equity settled programs to cash settled programs. The amount of compensation will be based on the number of share rights allotted for each of the programs and the Meda share price at completion of CoC. The vesting period for each program has been reduced and runs to August 2016. If CoC does not occur the LTI-programs will continue in full force and effect.

Fair value – financial assets and liabilities

The table below comprises the consolidated financial assets and liabilities that are measured at fair value.

Interest rate swaps and currency forward contracts are reported as level 2 and used for the purpose of hedging. Fair value measurement for interest rate swaps is calculated by discounting with observable market data. Measurement of fair value for currency forward contracts is based on published forward prices.

Available-for-sale financial assets are reported as level 1 and 2. Level 1 comprises quoted interest-bearing securities and fair value measurement is based on quoted prices on an active market. Level 2 mainly comprises fund holdings where fair value measurement is based on observable market data.

Group derivatives are covered by right of set-off between assets and liabilities with the same counterparty. Offsetting of assets and liabilities has not been applied. Derivatives recognized as assets and liabilities are presented in the table below.

No transfers have been made between level 1 and level 2 during the period.
